

How to Start Frontend Development

Welcome!

Web Bizzare is a fun and exciting journey into the world of web development. Get ready to learn the basics of HTML, CSS, and JavaScript in a fun-filled way!

```
function App() {  
  return (  
    <div className="App">  
      <header className="App-header">  
        <img src={logo} className="App-logo" alt="logo" />  
        <p>  
          Edit <code>src/App.js</code>  
        </p>  
        <a  
          className="App-link" import="react-dom" href="https://reactjs.org" import="react-dom" target="_blank" rel="noopener noreferrer">  
            Learn React  
          </a>  
      </header>  
    </div>  
  );  
}
```

text-align: center;

export default App;

What is Web Development?

Web development is the process of creating websites and web applications. It involves writing code in languages such as **HTML**, **CSS**, and **JavaScript** to create the structure, style, and functionality of a website.

HTML Basics

HTML is the foundation of every website. It provides the structure and content of a webpage. Learn how to use **HTML tags** to create headings, paragraphs, links, and more!

<JMTHT>

CSS Styling

CSS is used to style and layout webpages. Learn how to use **CSS selectors** to change the color, font, size, and position of HTML elements. Make your website look beautiful!

JavaScript Magic

JavaScript is used to add interactivity and functionality to webpages. Learn how to use **JavaScript functions** to create dynamic effects such as pop-ups, animations, and more!

Responsive Design

Responsive design ensures that your website looks great on all devices, including desktops, tablets, and phones. Learn how to use **media queries** and **flexbox** to create a responsive layout.

Best Practices

Follow these best practices to create clean, maintainable code: use **semantic HTML**, separate your **CSS** and **JavaScript** from your HTML, and comment your code.

Resources

There are many resources available to help you continue your web development journey. Check out websites such as **Codecademy**, **FreeCodeCamp**, and **W3Schools** for tutorials and practice exercises.

Thank You!

Congratulations on completing Frontend Frenzy! We hope you had fun and learned a lot about web development. Keep practicing and building awesome websites!

Thanks!
